Technology Scouting to Accelerate Innovation Implementing an External Sourcing Program

August 4-5, 2009 • Cambridge, MA

PROCTER & GAMBLE'S CEO ALAN G. LAFLEY IS OFTEN QUOTED as saying, "half the company's ideas must come from the outside." Indeed, P&G is a leader in external scouting, and their open innovation efforts are paying off handsomely. In one respect Lafley restates an important insight voiced by Thomas Edison about a century ago: "Your idea has to be original only in its adaptation to the problem you're working on."

P&G is not alone; many top companies are moving to a more open form of technology and product development in which they leverage technical capabilities developed in other sectors or industries to address their own development needs.

Why? Going outside can speed and improve technical development, free up scarce internal resources for other high-impact activities, and lead to greater innovation.

If your company is seeking to accelerate or improve its technical and new product development efforts, we invite your participation in Management Roundtable's exclusive, top-rated workshop **"Technology Scouting to Accelerate Innovation: Implementing an External Sourcing Program"** to be held August 4-5, 2009, in Cambridge, Mass.

Led by Dr. Jay Paap, President of Paap Associates, who has more than three decades of experience in helping firms with technology scouting, corporate venturing and other approaches to open innovation, this session is designed to give you practical, immediately implementable action steps. In a combination of lecture, interactive discussions and group exercises, you will receive advice and guidance to ensure the success of your company's technology sourcing strategy and process.

"Any company, large or small, considering a tech scouting program, or already running one, should learn about the ideas presented in the workshop. It gives exactly the right overview of past and current thinking about the subject, with the right mix of tools and examples."

Michael Oristaglio, Schlumberger

Register Today!

This workshop is limited to 35 participants and has a history of selling out well in advance. We **strongly recommend** early registration.

7 Key Deliverables

You will return to your organization with:

- 1 Your own technology sourcing matrix
- 2 Competitive intelligence gathering tools
- 3 Suggested resources to tap for new technologies
- 4 Comparative best practices from leading firms
- 5 Recommendations and advice for your specific situation
- 6 Comprehensive reference materials
- 7 An implementation action plan

Who Should Attend

This session is recommended for anyone responsible for planning and executing a firm's technology and product development effort: senior and middle level managers from **New Product Development, Technology Development, Research, Engineering, Marketing, Alliance Management, Sourcing, New Business Development**

PROGRAM AGENDA

Day One Tuesday, August 4, 2009

- 8:30 – 10:00 **The Logic of External Sourcing – How It Provides Value**
- Overcoming challenges to pursuing innovation internally – the three R's: Resources, Risk, and Resistance
 - Collecting the intelligence on emerging markets and technologies that fuel innovation
 - Stimulating innovation and new ways of thinking within your firm
 - Speeding time to market
- 10:15 – 12:00 **Technology Scouting – What It Is and How It Works**
- The three basic elements of scouting
 - Organizational approaches – examples of some leading practitioners
 - Understanding your 'External Sourcing Posture'
 - Keys to effective scouting
 - Measuring success – how you know you are providing value
- 12:00 – 1:00 Lunch
- 1:00 – 5:00 **Identifying Technology Requirements**
- Developing a sourcing strategy to guide the search – the Technology Sourcing Matrix
 - Project driven requirements – using creative problem solving to accelerate developments
 - Technology forecasting – positioning the firm for the future
 - Scenarios and other strategic planning exercises
 - Disruptive technologies – what they are and how to protect yourself from being 'disrupted'
 - Using Technology Scouting to stimulate the 'fuzzy front end' of your development process
- 5:00 – 6:00 **Networking reception**

“This course is not only relevant to managers but also to individual scouts. Fundamentals for scouting are described clearly. The course clearly states the questions that need to be asked at each stage of scouting. Asking the right questions made the scouting process sensible.”

Sathya Kalambur, Frito Lay

Day Two Wednesday, August 5, 2009

- 8:30 – 12:00 **Identifying Technology Sources**
- Sources of information – selected Competitive Technical Intelligence tools geared to the open innovation model
 - Mistakes firms make when seeking technical solutions externally
 - Unexpected sources of technology – the importance of looking outside one's industry
 - The art of thinking generically about your needs
 - Assessing the fit – the elements of a 'good fit'
- 12:00 – 1:00 Lunch
- 1:00 – 3:00 **Managing the Transfer**
- Key steps in collaborative relationships
 - Structural options for leveraging external technology: licenses, alliances, acquisitions, spin-offs, and contracting
 - Managing Intellectual property – assigning value, attributing credit, and protecting your interests
 - Overcoming internal barriers to collaboration – the importance of managing the culture
- 3:00 – 4:30 **Action planning and wrap-up**

About the Instructor

Jay Paap, President of Paap Associates, serves on the faculties of the Industrial Relations Center at Cal Tech and the Executive Program at The Sloan School (MIT), is a Fellow of The Society of Competitive Intelligence Professionals, and is a PDMA-certified new product development professional. He received his Ph.D. from

MIT's Sloan School of Management with concentrations in technology management and organization design.

Dr. Paap has been active in the management of technology for 35 years, and has consulted with industrial and governmental organizations for over 30 years. Prior to founding Paap Associates, Jay was Partner at Data and Strategies Group, Principal at Ampersand Ventures, Director of Corporate Consulting at Venture Economics, and Associate Director of the Technology Management Group at Pugh-Roberts Associates. Before entering consulting, Jay was an officer in the US Air Force, responsible for developing and deploying advanced electronics equipment.

In 1992 he founded and ran the Commercialization Roundtable in which senior business development managers from major companies met every two or three months through 1995 to share experiences on corporate venturing and develop best practices concerning how major corporations can effectively commercialize new technology based concepts and businesses. Among the members of the Roundtable were AT&T, Digital, Dow, DuPont, GTE, IBM, MCC, Motorola, and Xerox.

10 KEY BENEFITS

In two comprehensive days, you will receive a clear set of guidelines to enable you to set up an effective technology scouting program in your organization. By participating, you will learn:

- 1 How to identify technologies required to address current or potential customer needs
- 2 How to anticipate emerging technical trends while there is still time to react – the difference between invention and innovation; knowing how to commercialize
- 3 How to set up an effective scouting program; why it is necessary, what best-in-class companies are doing
- 4 How to identify the most promising technologies and sources worldwide; how to assess the potential value of IP
- 5 What tools and techniques you can use to anticipate disruptive technologies
- 6 How to develop a comprehensive sourcing strategy using the Technology Sourcing Matrix
- 7 Where to find unexpected technology nuggets; including entrepreneurial, university and government sources
- 8 How to choose and structure the most favorable arrangement (alliance, license, acquisition, joint development, and/or spin-out)
- 9 How to best position your firm for the future – how to use competitive intelligence, roadmapping and market forecasting
- 10 To integrate technology scouting with overall open innovation efforts

ABOUT MANAGEMENT ROUNDTABLE

The Management Roundtable (MRT) is the foremost knowledge and networking resource for industry practitioners involved in product, service, technology, and business development. Practitioner-oriented and unbiased, MRT's focus is on strategies and processes that enable speed, innovation, profitability, and overall competitive advantage. Through its highly regarded conferences and publications, MRT has helped companies achieve their objectives since 1980. Its membership offering, the Management Roundtable *FastTrack*, (www.roundtable.com/membership) offers direct, year-round access to leading-practice insights via teleconference and online reports.
